

November 30, 2015: Volume XXI – Issue 11

CUE TIP OF THE WEEK

Protect your precious pool cue. Most people know that heat during the summer can damage your pool cue. It is important to know that the cold can also cause damage to your cue. Humidity in particular is a danger, which includes condensation that can build up in your car – and extreme changes in the weather can cause the wood to expand and contract with temperature fluctuations, which can result in your cue warping. Lesson learned? Don't leave your cue in your car.

- New Spring Session Begins Week of 01/25/16

WE WANT YOUR VOTE!

We are considering the addition of a new division. Thursday nights, beginning in January, we will have a double jeopardy division! This means that each team that plays on Thursday nights will have TWICE the opportunity to qualify for Vegas in 2017 by playing 8ball one week, 9ball the next, then 8ball the following week, and then 9ball again... so on and so on...

EXCUSE OF THE WEEK! WHAT'S YOUR EXCUSE?

Holiday Shopping Frenzy! I'm either too busy planning my list, too busy shopping the stores for great sales, or too busy making online purchases to focus on pool!
